To Whom It May Concern,

I had the pleasure of working with Danny Diaz on Related's Town Village Walk development in Fort Myers, FL, where Danny served as one of our primary architects and the lead construction administration manager with MSA Architects. Town Village Walk is a Class A multifamily residential community with an approximate construction value of \$50MM.

Danny was equally comfortable and competent as a designer and in construction oversight, easily shifting between technical design and coordination items to address the operational and practical challenges of large-scale construction. One of the most valuable ways Danny's skillset bridges between design and construction is in his communication style – professional, but relaxed and calm, and always with a bent towards moving the team collectively forward. Those communication skills were always a benefit in high-stress OAC discussions.

Danny was an invaluable asset in making Town Village Walk a success and I hope to have the opportunity to work with him again in the future. I endorse him unequivocally for any design or construction oversight roles involving major multifamily development. Anyone who would like more background or information on my experience working with Danny is welcome to contact me at the information provided below.

Regards,

Charles Humphreys
Development Manager
